FinTrust | Role separation

Release 1 | Planning and design evidence | 12 October 2026

Technical recovery != compliance decision. Account scope and backend role checks apply. Local identity registry and governance receipts are outside the relational identity model.

Role	Owns	Does not own
Administrator	User lifecycle, roles, governance and oversight.	Routine Analyst upload/correction/review authority.
Analyst	Scoped admission, business correction and risk review decisions.	Technical redrive or platform administration.
Auditor	Read-only scoped records, reports and audit history.	Business or technical mutations.
Maintainer	Failure diagnosis and controlled technical retry/recovery.	Compliance review decisions.
